

With Maestro, what you see is what you print, consistently.

Maestro was designed to deliver accurate, predictable color for the Postmark line of CMYK printers.

Using a simple graphical interface, precise color control no longer requires an educational journey through gamuts, standards, and profiles.

Whether your jobs are made up of CMYK, Pantone spot colors, or a combination of both, Maestro gives you the color control you want and the results your customers expect.

POSTMARK

Spot Color Matching

Maestro helps you match a job's spot colors through an interactive display. Print a swatch sheet of the Pantone colors; choose the result that matches the intended output and release the job for production printing. It's that simple. Curated spot color libraries and archive job settings further streamline the process for repeat jobs.

Intuitive GUI

An uncomplicated interface means less time training and more time producing. Instantly recognizable and intuitive, operators adapt quickly to its functionality.

Multi-platform (Mac or PC) compatible

Maestro's client-server architecture means that jobs can be submitted, viewed, and processed from both Macs and PCs anywhere on the network. Additional client licenses are available for high-production environments.

Fastest Professional Grade RIP Available

Based on the Harlequin RIP core, Maestro's RIP is recognized as the fastest of its kind. Typical job processing speed is measured in seconds, even for complex, image-rich work. Maestro is a native PDF interpreter that runs on 64-bit Windows 7, 8, or 10. Workflow pre-flight options are available.

Global or Specific Color Adjustment

Choose between Spot Color Matching or Global Color Adjustments through Maestro color tools. Whether the job contains RGB, CMYK, spot colors, or a combination, getting the right color on paper is quick and painless.

Economical - Low Cost of Ownership

Maestro's low cost of ownership means it pays for itself quickly. Increased productivity, a short learning curve, and ease of use contribute to a reduced cost per piece, increasing your margin and making you more competitive.
